

Summary

Highly dedicated and extensive experience in testing Web, API, and mobile applications within diverse technological domains.

Proficient in agile methodologies and in various testing tools, including Cypress, Playwright, and Postman, to ensure comprehensive testing coverage.

Skilled in test planning, execution, and defect tracking.

An adept communicator who efficiently documents and conveys test-related findings to enhance product quality.

Key Summary Skills

- Agile & Scrum/ Kanban Methodologies
- Quality Test plans, Test scripts creation, Test Strategies & Coverages
- BDD, TDD, Smoke, Regression, Integration, Sanity, Positive & Negative Testing
- UI & API (SOAP/REST) Testing
- Cross-browser/Platform Testing
- End-to-end & Mobile-device testing
- Defect & Bug Tracking Report
- User Stories Creation & Documentation
- Manual & Automated Testing in: Playwright, Cypress, Postman, SQL, Git and API tests experience

Education

BACHELOR OF INFORMATION TECHNOLOGY

Australia Catholic University, Sydney, Australia 2015 - 2018

Experience

QUALITY TEST ANALYST / ENGINEER

Kinsta Hosting Jan 23 - Present

- Detailed orientation in testing and identifying test scope, test planning, managing test execution, reporting metrics and tracking bugs
- Demonstrated proficiency in designing, maintaining, and executing test cases using the Playwright automation tool
- Developing test cases using BDD approach based on the user stories provided within the sprint using a web-based test management tool
- Proficient in documenting and effectively communicating all test-related findings to the team
- Conducted thorough manual testing of web pages and various devices using BrowserStack, ensuring optimal cross-browser and cross-device compatibility

PRODUCT QUALITY ANALYST

Elmo HR Software Jan '22 - Dec '22

- Provided the final sign-off for both QA and production testing phases, ensuring product quality and readiness for release
- Provided documentation for all issues, release plans, product workflows, and test scripts, for reference and issue resolution
- Conducted internal training sessions for the team to ensure a seamless integration of new feature capabilities, resulting in improved overall efficiency
- Played an active role in creating and prioritising the product backlog and roadmap, ensuring alignment with the product vision and strategic goals

QUALITY TEST ANALYST / ENGINEER

Ezycollect Fintech Jan '21 - Dec '21

- Contributed to the QA team's transition from manual testing to Cypress automation
- Managed the comprehensive coordination of end-to-end testing processes, formulating test plans, and overseeing their execution through to production release
- Worked with cross-functional teams to define comprehensive test strategies and plans, ensuring alignment with project objectives and industry standards
- Conducted extensive training sessions for the QA team, facilitating a smooth transition to a new testing tool

SOFTWARE TEST ANALYST

3P Learning Edtech April '15 - Dec '20

- Experienced in thorough manual testing across various web platforms and devices, ensuring comprehensive test coverage and the delivery of high-quality software
- Experienced in creating and executing SOAP/ REST automated tests with Postman in Javascript
- Experienced in working with MySQL database and Tableau
- Executed all levels of testing such as functional, regression and user acceptance testing
